

MorNuCo Inc. Founders Honored in Receiving Award

Nick Miner, V.P. of Business Development

MorNuCo, Inc. continues its monthly report for participating physicians and health professionals in order to answer common questions relating to the ONCOblot® Tissue of Origin (Cancer) Test.

On May 14th, the first ever L. Stephen Coles, M.D., Ph.D. Award for Research and Science Innovation in Aging and Age Management Medicine was presented at the AMMG Conference in Orlando, Florida to MorNuCo founders Dr. D. James Morr  and Dr. Dorothy M. Morr . The Morr s graciously accepted this honor, which celebrates their significant contributions to age management medicine.

Pictured left to right – Dr. Edwin Lee with Dr. D James Morr  and Dr. Dorothy M. Morr 

Dr. Edwin Lee was in attendance to introduce the Morr s and present the award. Dr. Lee has had success utilizing the ONCOblot test within his practice.

Dr. Stephen L. Coles was a remarkable physician and researcher, who dedicated

much of his life to advancing the field of age management. Regrettably, the scientific and medical communities lost Dr. Coles in November of 2014. In large part, this award pays homage to Dr. Coles as a great example of an individual with a strong desire to drive scientific discovery. Upon receiving this award, Dr. D. James Morr  stated, “It is a true privilege to be recognized for this award given it is named after such an impactful person to this field”.

Undoubtedly the Morr s exemplify the spirit for which this honor is awarded, including; a passion for discovery and the highest ethics and scientific values in conducting research and innovation within the fields of aging and age management medicine.

With the advent of technologies like the ONCOblot® Tissue of Origin test and the intervention strategies that the Morr s have dedicated their lives to developing, physicians are increasingly finding themselves better prepared to handle age related diseases, such as cancer.

Congratulations to the Morr s on this wonderful acknowledgment of their work and thank you to AMMG for recognizing the resilience and dedication the Morr s have encompassed over the course of their accomplished careers.
